Automatic Evaluation of Myocardial Infarction from Delayed-Enhancement Cardiac MRI. The two main objectives of the EMIDEC challenge are first to classify normal and pathological cases from the clinical information with or without delayed enhancement MRI (DE-MRI), and secondly to automatically detect the different relevant areas (the myocardial contours, the infarcted area and the permanent ...

Environmental factors are the largest contributors to cardiovascular disease. Here we show that cardiac organoids that incorporate an oxygen-diffusion gradient and that are stimulated with the neurotransmitter noradrenaline model the structure of the human heart after myocardial infarction (by mimicking the infarcted, border and remote zones), and recapitulate hallmarks of myocardial ...

Pathophysiology of Myocardial Infarction

We hypothesized that atlas-based analysis of patients with myocardial infarction would enable better quantification of remodeling features associated with myocardial infarction. The Cardiac Atlas Project (CAP, <http://www.cardiacatlas.org>) is a world-wide web-accessible resource, comprising a population atlas of asymptomatic and pathological hearts . The CAP facilitates large-scale data sharing of cardiac imaging studies and their corresponding derived analyses that describe the cardiac shape ...

A diagnosis of myocardial infarction is created by integrating the history of the presenting illness and physical examination with electrocardiogram findings and cardiac markers. A coronary angiogram allows visualization of narrowings or obstructions on the heart vessels, and therapeutic measures can follow immediately. At autopsy, a pathologist can diagnose a myocardial infarction based on anatomopathological findings. A chest radiograph and routine blood tests may indicate complications or pre

An acute myocardial infarction (AMI) occurs due to the occlusion of a coronary artery with a thrombus formation. This event causes necrosis of cardiac tissue and can predispose the patient to the development of multiple dysrhythmias and death. The blood supply to the myocardium is accomplished through arteries that lie on the outside of the ...

Bing: An Atlas Of Myocardial Infarction

Abstract. Myocardial infarction is defined as sudden ischemic death of myocardial tissue. In the clinical context, myocardial infarction is usually due to thrombotic occlusion of a coronary vessel caused by rupture of a vulnerable plaque. Ischemia induces profound metabolic and ionic perturbations in the affected myocardium and causes rapid depression of systolic function.
