Bacteria And Viruses Guided Study

Viruses are not living organisms, bacteria are. Viruses only grow and reproduce inside of the host cells they infect. When found outside of these living cells, viruses are dormant. Their “life” therefore requires the hijacking of the biochemical activities of a living cell. Bacteria, on the other hand, are living organisms that consist of single cell that can generate energy, make its own food, move, and reproduce (typically by binary fission). This allows bacteria to live in many places ...

UNIT 8: VIRUSES AND BACTERIA (STUDY GUIDE) Flashcards ...

This product contains an informative and engaging power point that introduces the topic of viruses and bacteria, is accompanied by a thorough 3-page guided note handout to be filled in by the students as the slides are presented, and includes a 2-page review worksheet.
