In this series, we'll be using PyTorch, and one of the things that we'll find about PyTorch itself is that it is a very thin deep learning neural network API for Python. This means that, from a programming perspective, we'll be very close to programming neural networks from scratch. For this reason, it will definitely be beneficial to be aware of neural network and deep learning fundamentals.

Summary: Deep Reinforcement Learning with PyTorch As we've seen, we can use deep reinforcement learning techniques can be extremely useful in systems that have a huge number of states. In these systems, the tabular method of Q-learning simply will not work and instead we rely on a deep neural network to approximate the Q-function.
