### **Bing: Documenting Software Architectures Views And**

Documenting Software Architectures Software architecture has become a widely accepted conceptual basis for the development of nontrivial software in all application areas and by organizations of all sizes. However, the treatment of architecture to date has largely concentrated on its design and, to a lesser extent, its validation.

### **Documenting Software Architectures**

A module is an implementation unit of software that provides a coherent unit of functionality. Modules form the basis of many standard architecture views. This chapter defines modules and outlines the information required for documenting module views.
