Lowercase letters should NEVER be used on drawing title blocks. Figure 3-51 shows lowercase letters along with guidelines and strokes used to form each letter. The crosses of f and t are on the waist line and extend the same distance on either side of stroke 1. The horizontal stroke of e is just above midheight.

Technical lettering is the process of forming letters, numerals, and other characters in technical drawing. It is used to describe, or provide detailed specifications for, an object. With the goals of legibility and uniformity, styles are standardized and lettering ability has little relationship to normal writing ability. Engineering drawings use a Gothic sans-serif script, formed by a series of short strokes. Lower case letters are rare in most drawings of machines.

INTRODUCTION. Lettering is an important part of engineering drawing. It gives information regarding size, and instructions, in the form of notes and dimension. On a drawing, whole of the written information is always in the form of lettering. It is not hand written. Also, it may be added here, that Lettering is appropriate and correct words but not printing (Printing means production of printed material on a printing press).
