Read Online Factors Affecting Retention In Paper Chromatography

The amount that each component of a mixture travels can be quantified using retention factors (R_f). The retention factor of a particular material is the ratio of the distance the spot moved above the origin to the distance the solvent front moved above the origin. It can be calculated using the formula: The R_f values for each of the components in the previous example can be calculated:

Pharmastuff4u: RF VALUE - RETENTION FACTOR CHROMATOGRAPHY

Kehr (2004), explains that the implicit retention factors in spontaneous, expressive and pleasurable behavior and can be divided into three variables; power, achievement and affiliation. Power refers to dominance and social control.

Bing: Factors Affecting Retention In Paper

The newly created model combines the previously mentioned authors thought and shows that customer retention is influenced by three factors customer satisfaction, relationship quality and switching costs. The new model is the fact that indicates two factors influencing the switching Costs.
