Understanding Tail-Risk Hedges and Why They Are ...

Gold and tail-risk hedging: an international perspective Because gold tends to have little correlation with many asset classes, it is a strong candidate for portfolio diversification. Unlike other assets typically considered diversifiers, gold's correlation to other assets tends to change in a way that benefits portfolio returns.

Gold: hedging against tail risk - SPDR Gold Shares

Gold has low or negative correlation with other assets. Therefore, it is a portfolio diversifier and a safe haven against tail risks, like financial crises. During crises asset prices can move downward more than three standard deviations from their mean, reducing the worth of the portfolio.
