SEC & SSER Patient Safety Measurement System for Healthcare

Patient safety event reporting systems are ubiquitous in hospitals and are a mainstay of efforts to detect patient safety events and quality problems. Incident reporting is frequently used as a general term for all voluntary patient safety event reporting systems, which rely on those involved in events to provide detailed information. Initial reports often come from the frontline personnel directly involved in an event or the actions leading up to it (e.g., the nurse, pharmacist, or ...

Serious Safety Events - ASHRM

The Patient Safety Event Taxonomy developed and tested in this study represents a synthesis of traditional, hierarchical classifications represented by single topic areas and settings and the heuristic, multidimensional/multisetting classifications that rely on a systems approach to understanding patient safety . It includes all events that are not due to an underlying physiological or pathological process and is sensitive to minor variations among similar events.
