Herstein's mathematical writing is some of the best, at times a pleasure to read. I recommend this book, especially for self study or a supplement to an algebra course. This book is worth a skim even for its historical value as an example of who to construct a mathematical text.

Bing: I N Herstein Topics In

The second book is a good undergraduate introduction. However, Topics could be use at the graduate level. I. N. Herstein was a great authority and his writing has unusual clarity. Topics is not only more advanced than the other but I think it is simply the better book. The first edition helped me in graduate school some thirty years ago.

Israel Nathan Herstein was a mathematician, appointed as professor at the University of Chicago in 1951. He worked on a variety of areas of algebra, including ring theory, with over 100 research papers and over a dozen books.

Topics in Algebra, 2nd Edition | Wiley

n as inverse element of m n . 2. Prove that if G is an abelian group, then for all $a, b \in G$ and all integers n , $(ab)^n = a^n b^n$.
Solution: We resort to induction to prove that the result holds for positive integers. For $n = 1$, we have $(a^1 b^1)^1 = a^1 b^1 = a^1 b^1$. So the result is valid for the base case. Suppose result holds for $n = k - 1$, i.e. $(ab)^{k-1} = a^{k-1} b^{k-1}$.

Topics in Algebra by I.N. Herstein - Goodreads

N. Herstein was a great authority and his writing has unusual clarity. Topics is not only more advanced than the other but I think it is simply the better book. The first edition helped me in graduate school some thirty years ago. The treatment of group theory is particularly rich, with a thorough explication of the Sylow theorems. ...
