LNG as ship fuel - DNV GL

Gas carriers around the world have been using liquefied natural gas (LNG) as part of their fuel source for decades. The safety record of LNG carriers is extremely good. Even though most of the principles remain the same, using LNG as fuel for conventional ships introduces new systems on board together with their associated risks.

Floating Wind to Grow '2000-fold' by 2050, DNV GL

Although global demand for natural gas peaks in 15 years, several regions, including Greater China and Europe, will continue to experience increasing deficits. North America will show a strong gas surplus, and, thus, LNG exports will grow. Global liquefaction and regasification capacity will grow in tandem to more than double current levels. As average shipping distance will also grow, LNG tankers will increase their gas transport market share and transport in tonne-miles will quadruple.

DNV GL forecasts a strong future scenario for floating wind energy. Its model predicted that the installed capacity of floating wind would grow from 100 MW today to 250 GW in 2050. Or in other words, a 2000-fold increase.

LNG supply and demand | DNV GL

The containment systems which store LNG on board ships follow the design principles known from gas carriers. Nevertheless, LNG as a ship fuel has initiated new design concepts for containment systems. To drive forward these innovations, DNV GL is working with a number of LNG containment system suppliers to gain approval of their new systems.

Liquefied natural gas (LNG) - DNV GL

DNV GL, 1400 Ravello Drive, Katy TX 77449. Date: Wednesday, February 26, 2020 from 8:30 am to 4:30 pm. Value for attending. As a safe and low-carbon alternative to traditional energy sources, liquefied natural gas (LNG) has risen rapidly as the future energy source of choice with a number of important projects already underway in North America and a more than doubling of capacity planned during the next waves of developments.

Is good a perfect enemy? DNV GL's LNG conundrum ...

As a leading service provider with decades of experience in the maritime and oil and gas industries, we have gained extensive knowledge across the entire LNG value chain - from the drilling hole all the way to the end consumers.

LNG regulatory update

The fleet of LNG-fuelled vessels plying the world's oceans comprises passenger ferries, offshore service vessels, coastguard vessels, tankers and many other types. Even a DNV GL-classed high-speed catamaran with LNG-powered gas turbine is in operation. New orders have been placed for RoRo vessels, multi-purpose freighters, container ships and tugs as well as passenger ferries, offshore service vessels and cruise ships.
