Define business document and media support Generate Media CRS116 Define Output Server MNS218 Define Output Server Type MNS217 Define Output Service MNS216 Connect Media/Output Service MNS214

Movex Output Management 3 Streamserve

The M3 Output Pack adds all document handling features of StreamServe to your M3 system. This is a tight integration with which you manage common challenges such as manual steps required in the document handling process, hardcoded document layouts making it hard to meet the changing requirements of customers and organizations, and the need for separate hardware for different output channels.

Posts about streamserve written by senojlien and bjrnt1. There are several ways of getting printouts from M3 (Movex) to Excel. You can create queries, use StreamServe XML etc but all of these options lack the flexibility of an easy way to design the layout with the correct formatting and graphics, they also lack the ability for the user to print exactly as they are used to.

movex blog: Configurable XML documents from M3

Anybody who has worked with Infor M3 (or the older Movex versions) knows what a pain output management can be. The basic reports which come out of M3 look like they were created back in the old greenbar paper, dot-matrix printer days (because, well, chances are they were). Getting data out of the system in a manner which users want is often a struggle that leads to developing a separate reporting platform, using software like Crystal Reports or Microsoft Reporting Services.
