### **Bing: Nursing Research For Evidence Based**

The definition of evidence-based nursing, as accepted by the National Council of State Boards of Nursing, is a rigorous methodology in which all the research data for a particular problem or issue are analyzed together, then combined with patients' values and preferences, as well as professional expertise – your accumulated experience, education and skills.

### **Exploring evidence-based practice research : Nursing made ...**

Although the purposes of nursing research (conducting research to generate new knowledge) and evidence-based nursing practice (utilizing best evidence as basis of nursing practice) seem quite different, an increasing number of research studies have been conducted with the goal of translating evidence effectively into practice. Clearly, evidence from research (effective innovation) must be accompanied by effective implementation, and an enabling context to achieve significant outcomes.
