Sensory Integration Theory. Our understanding of sensory integration was initially developed in the late 60s and 70s by Jean Ayres, an occupational therapist and psychologist with an understanding of neuroscience, working in the United States of America. Jean Ayres was interested in explaining how difficulties with receiving and processing sensory information from one's body and environment could relate

Sensory Integration: A. Jean Ayres' Theory Revisited ...

Jean Ayres was the first occupational therapist to conceptualize Sensory Integration (SI) theories and therapies to address these deficits. Her work was based on neurological knowledge of the 1970's. Since then, advancements in neuroimaging techniques make it possible to better understand the brain areas that may underlie sensory processing deficits in ASD.

Sensory Integration Theory Revisited

The term “sensory integration” as used by Ayres refers to the ability to produce appropriate motor and behavioral responses to stimuli. In her work Sensory Integration and the Child, Ayres observed hyper- and hypo-responses to sensory

stimuli in individuals with ASD. Specifically, she noted that these individuals exhibited problems in registration (signal detection and interpretation), in modulation (signal inhibition or propagation), in interacting with certain objects, and/or in ...

Sensory Integration Theory Revisited

Neural Foundations of Ayres Sensory Integration® “ASI intervention is based on the concept of neuroplasticity, that is, that the nervous system changes in response to experience. Thus, through guided participation in sensorimotor activities targeting a child’s individual needs, ASI intervention is hypothesized to improve function, skill, and behaviour as a basis for participation in everyday activities.
