Social impact assessments (SIAs) are an important part of the investment phase for many companies in India. Derived from the Environmental Impact Assessment model (EIA), which first originated in the 1970s as a way to evaluate the impact of infrastructural projects on communities, SIAs are now used by a number of countries like India in urban planning and development to assess the impact of projects on individuals and their communities.

What is an EIA? Environmental Impact Assessment (EIA) is a tool used in most environment based organisations to measure the impact of the environment through the assessment tool. It measures the environmental consequences of a particular plan or policy. This could be important for Urban Planning and Development policies because many of these policies are centered on the environment.
