Jakob Nielsen, a renowned web usability consultant and partner in the Nielsen Norman Group, and Rolf Molich, another prominent usability expert, established a list of ten user interface design guidelines in the 1990s. Note that there is considerable overlap between Nielsen and Molich's heuristics and Ben Shneiderman's 'eight golden rules'.

user interface guidelines for web applications

The user interface is necessary for a good user experience — meaning the overall experience a user has with a website or software. The aim of every web designer is, therefore, to lay the foundations for a good user experience with an intuitive user interface. This works best with a graphical user interface.

32 User Interface (UI) Elements Designers Need To Know

User interface (UI) elements are the parts we use to build apps or websites. They add interactivity to a user interface, providing touchpoints for the user as they navigate their way around; think buttons, scrollbars, menu items and checkboxes. As a user interface (UI) designer, you'll use UI elements to create a visual language and ensure consistency across your product—making it user-friendly and easy to navigate without too much thought on the user's part.
