What a Plant Knows | Daniel Chamovitz | Macmillan

But now, in *What a Plant Knows*, the renowned biologist Daniel Chamovitz presents an intriguing and scrupulous look at how plants themselves experience the world—from the colors they see to the schedules they keep. Highlighting the latest research in genetics and more, he takes us into the inner lives of plants and draws parallels with the human senses to reveal that we have much more in common with sunflowers

and oak trees than we may realize.
